Workshop on Asymptotics for Stochastic Dynamical Systems

Stochastic dynamical systems have been widely used in many branches of science and industry, for example, engineering, physics, biology, finance, renewable energy and medicine, etc. The conference aims to bring UK researchers and their research students along with international invited speakers together to promote, encourage, and influence more cooperation, and to bring together various disciplines e.g. theoretical, numerical and applied that attempt to understand stochastic dynamical systems and solve practical problems.

Invited Speakers

Marc Arnaudon	David Elworthy	Xuerong Mao	Anton Thalmaier
Tomás Caraballo	Chunrong Feng	Yonghua Mao	Bo Wu
Thomas Cass	Martin Grothaus	Zhongmin Qian	Lihu Xu
Lijuan Cheng	Xianping Guo	Michael Röckner	Xicheng Zhang
Dan Crisan	Xue-Mei Hairer	Sotirios Sabanis	Tusheng Zhang
	Des Higham	Agnès Sulem	Huaizhong Zhao
