Workshop on Asymptotics for Stochastic Dynamical Systems

Stochastic dynamical systems have been widely used in many branches of science and industry, for example, engineering, physics, biology, finance, renewable energy and medicine, etc. The conference aims to bring UK researchers and their research students along with international invited speakers together to promote, encourage, and influence more cooperation, and to bring together various disciplines e.g. theoretical, numerical and applied that attempt to understand stochastic dynamical systems and solve practical problems.

Invited Speakers

Jianhai Bao	Chunrong Feng	Eugene Lytvynov	Sotirios Sabanis
Tomás Caraballo	Dmitri Finkelshtein	Yonghua Mao	Jinghai Shao
Thomas Cass	Martin Grothaus	Hiroyuki Matsumoto	Agnès Sulem
Siyang Cai	Xianping Guo	Bernt Øksendal	James Thompson
Yongmei Cai	Des Higham	Zhongmin Qian	Bo Wu
Dan Crisan	Xue-Mei Li	Panpan Ren	Guangyu Xi
David Elworthy	Kai Liu	Michael Röckner	Huaizhong Zhao
